

NHS MEDICAL POLICY

Ankle-Foot Orthoses (AFO) DME 2014-007

An Ankle-Foot Orthosis (AFO) may be indicated when **ALL** of the following are present:

1	The ordering provider has documented a specific process causing weakness or deformity of the foot and ankle and documented the deficit on physical examination.
2	The ordering provider has documented that stabilization is required for medical reasons.
3	The ordering provider has documented that the member is ambulatory and has the potential to benefit functionally.
4	The AFO is not prescribed solely for the prevention or treatment of a heel pressure ulcer.
5	The AFO is not prescribed solely for the treatment of edema.
6	The ordering provider has documented that the most cost-effective orthosis (prefabricated or off the shelf) was first considered and if that product cannot accommodate the needs of the member, a statement of why a custom orthosis is required has been provided.
